# Compatibility

X-keys USB devices require MacroWorks 3 for Windows XP, Vista, or 7 or ControllerMate for Mac OS-X. The X-keys XK-80 also has a "Hardware Mode" which gives it the ability to mimic a USB keyboard, mouse, or game controller (joystick) on any USB enabled operating system (including Linux). Learn more about Hardware Mode on our web site or contact our Technical Support Department (tech@xkeys.com).

## Identifying the Keys

Select appropriate icons or use the blank side of the legend sheet to create your own key legends. The keycaps snap off with a fingernail or small screwdriver. Apply the label under the keycap, and replace it. The key caps hold a legend 0.575" wide and 0.5" high (14.6mm x 12.7mm). Other options are available for printing legends for multiple units. Contact our Sales Department (sales@xkeys.com) for more information.

# Tall and Wide Double-keys

The included double-keys replace two single keys on the X-keys. To install a double key cap, remove two adjacent keys with the provided key-puller. Press the double-key in place over the two exposed switch stems and configure it in MW3.1 by selecting both keys, right-clicking, and selecting "Apply Large Key".

# **Backlighting**

All keys on the XK-80 have two backlighting colors (red and blue) and advanced programming functions in MW3 allow the user to manipulate them. By default when MW3 recognizes the X-keys, blue backlighting indicates the unit is ready for operation or programming. If you program a red layer shift or toggle key, the backlighting will also indicate the active layer.

#### **Feet**

The included angled feet may be snapped in to the bottom of the XK-80 to give it a slight tilt in either portrait or landscape orientation.
